

Quarterly Engineering Report

1. System Performance

The system uptime has improved significantly. Below is the breakdown by region:

Region	Uptime (%)	Latency (ms)	Status
North America	99.99%	45ms	Healthy
Europe	99.95%	120ms	Warning
Asia Pacific	99.90%	200ms	Critical

2. Implementation Details

We used a Python script to calculate the variance.

```
```python def calculate_metrics(data): """Calculates performance metrics"""  
return [x * 100 for x in data] ```
```

## 3. Next Steps

---

- [ ] Optimize database queries
- [x] Update documentation
- [ ] Hire more engineers EOF
